Rapid and unpredictable changes in the NHS make the need for good project management more important than ever. This introductory course will help you demystify project management so you can deliver successful projects despite change and uncertainty.

This practical course has been designed by project management professionals who have many years experience of working with the NHS. It is built on realistic interactive exercises based on current NHS issues enabling participants to apply the learning easily in real-life situations.

It will give you a concise overview of the key issues and essential ingredients for successful project management in the NHS. It will help you demystify the processes, decode some of the jargon and give you a good foundation for building your skills and confidence.

What you’ll learn

- Managing projects in the NHS - what do managers need to be aware of?
- Defining clear and achievable project aims and objectives
- Project roles and responsibilities - a framework for utilising the right people for the tasks
- Scheduling work - how can you ensure that your project team is working effectively and meeting their delivery targets
- Project planning - demystifying some of the jargon of project management or identifying a project management toolkit for improving efficiency
- Communicating effectively with all stakeholders - having the tools to keep your project on track and report to stakeholders
- Closing the project, delivering the results and handing over to the operations team

Who is it for?

This is for managers in the NHS who are responsible for managing projects alongside their other responsibilities, people new to project management, or those wishing to update and refresh their skills and understanding.

How To Book

<table>
<thead>
<tr>
<th>Price</th>
<th>£440.00 + VAT</th>
